ALL IN ONE. ALWAYS CONNECTED.

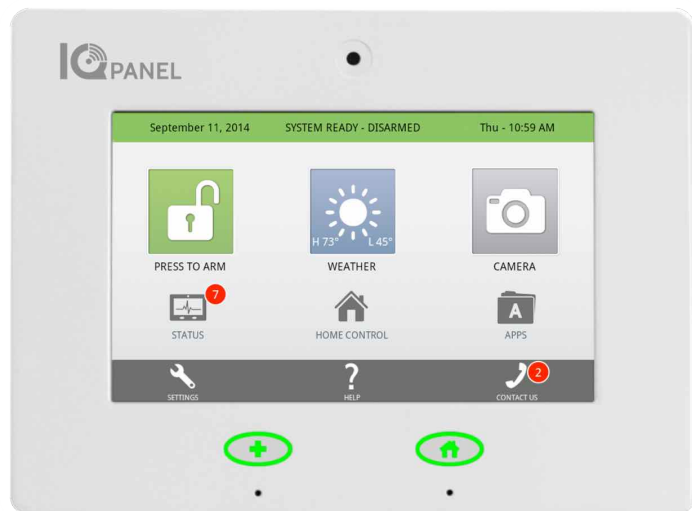

The Qolsys IQ panel redefines “all-in-one” with a 7" touchscreen, six communication radios and a built in camera. Running on Google's Android, the IQ Panel is intuitive and easy to use for dealers and end users.

FEATURES

- 7" touchscreen
- Android OS
- Panel camera
- 6 wireless radios built in (Wifi, Cellular, Security R/F, Z-Wave, Image Sensor, Bluetooth)
- Interactive services powered by Alarm.com
- Dual path connectivity via wifi and cellular
- Customizable photo frame
- Over the air software updates
- Home control (lights, locks, outlets, thermostat)
- Built in microphone
- Dedicated speaker for Two-Way Voice
- SD card slot
- Video tutorials and FAQs
- Dealer message center

ALL IN ONE. ALWAYS CONNECTED.

The world's first true "All-In-One" security and home automation platform, the IQ Panel is a 7" Android touchscreen with a built in camera and 6 wireless radios with no external antenna.

Android

The world's most popular mobile operating system

Interactive Services

Control the system from a smartphone or tablet

Alerts

When something needs your attention, you'll know

Language Support

Spanish built in, with a quick change bilingual app

Panel Camera

Disarm photos, alarm videos, and video memos

6 Radios

Security, Wifi, Cellular, Z-Wave, Image Sensor, and Bluetooth

Quick Install

A smart way to pair sensors faster than ever before

Custom Text to Speech

Type custom sensor names with the Android keyboard

Home Control

Control Outlets, Locks, Lights, and Thermostats

Severe Weather Alerts

Allow customers to receive important weather alerts

RETIRE THE TRUCK.

Connect to your customer's panel from a remote location and save yourself the hassle and cost of a truck roll. Adjust settings, change sensor names and behaviors, send messages, and so much more.

AirFX™

100% Accessible

Access every IQ Panel setting from any internet connection. Add, edit, or remove sensors, users, and notifications. System diagnostics, remote troubleshooting, and account management.

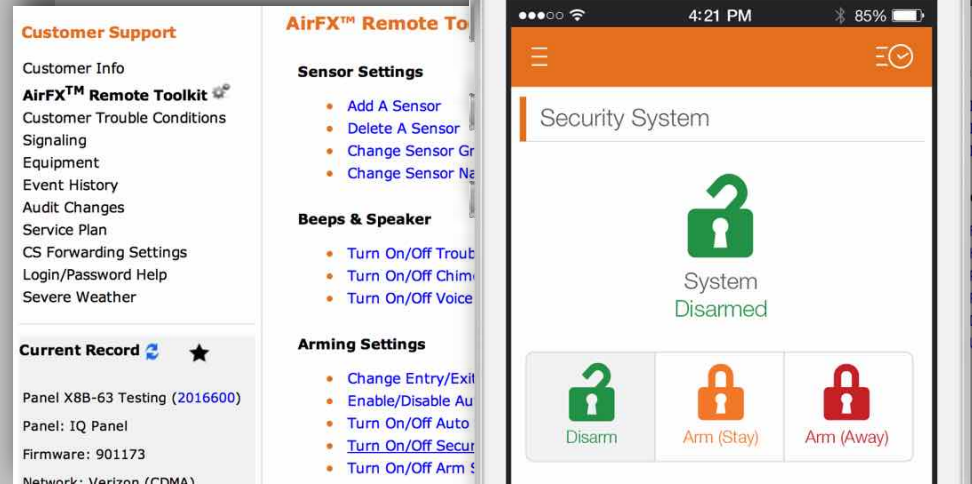

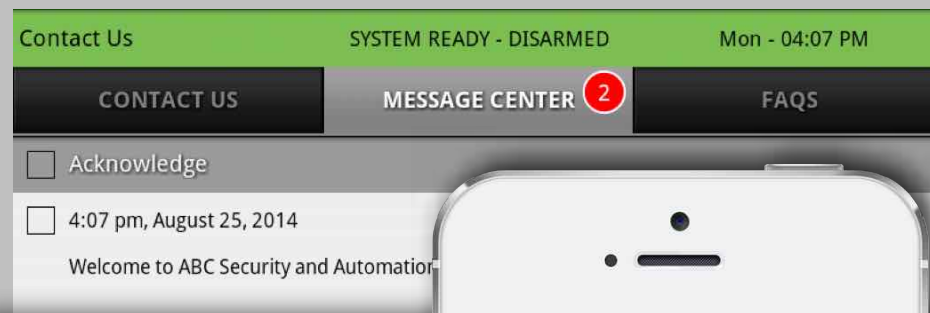

Software Upgrades

Save money using the panel's built in Wi-Fi connection to deliver enhancements and updates as they are developed

Dealer Messages

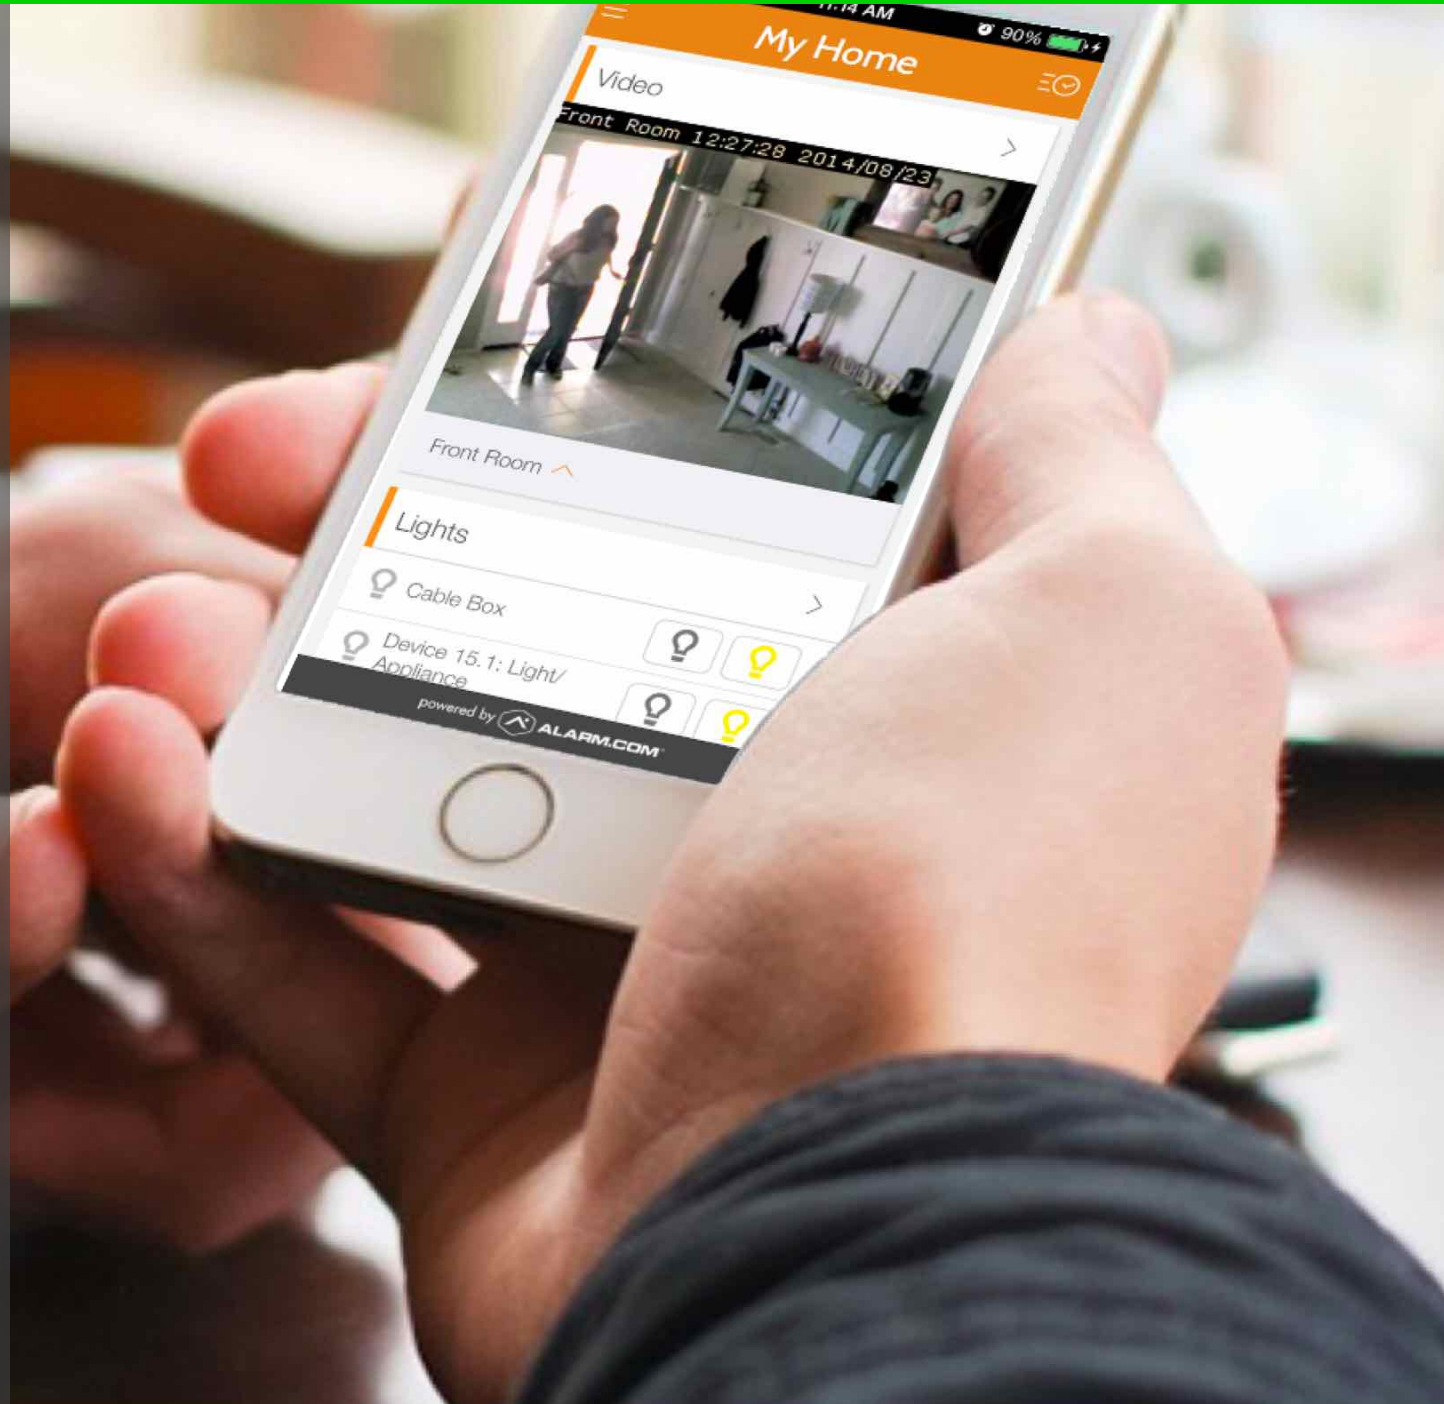

Send messages directly to the IQ Panel to increase retention, offer up-sells, and provide account information or payment reminders

Even when you are not at home you are always connected to your IQ Panel with the Alarm.com app. Arm your system, adjust your thermostat, lock your door, view your cameras and receive notifications and alerts sent via e-mail or text message.

AVAILABLE FOR

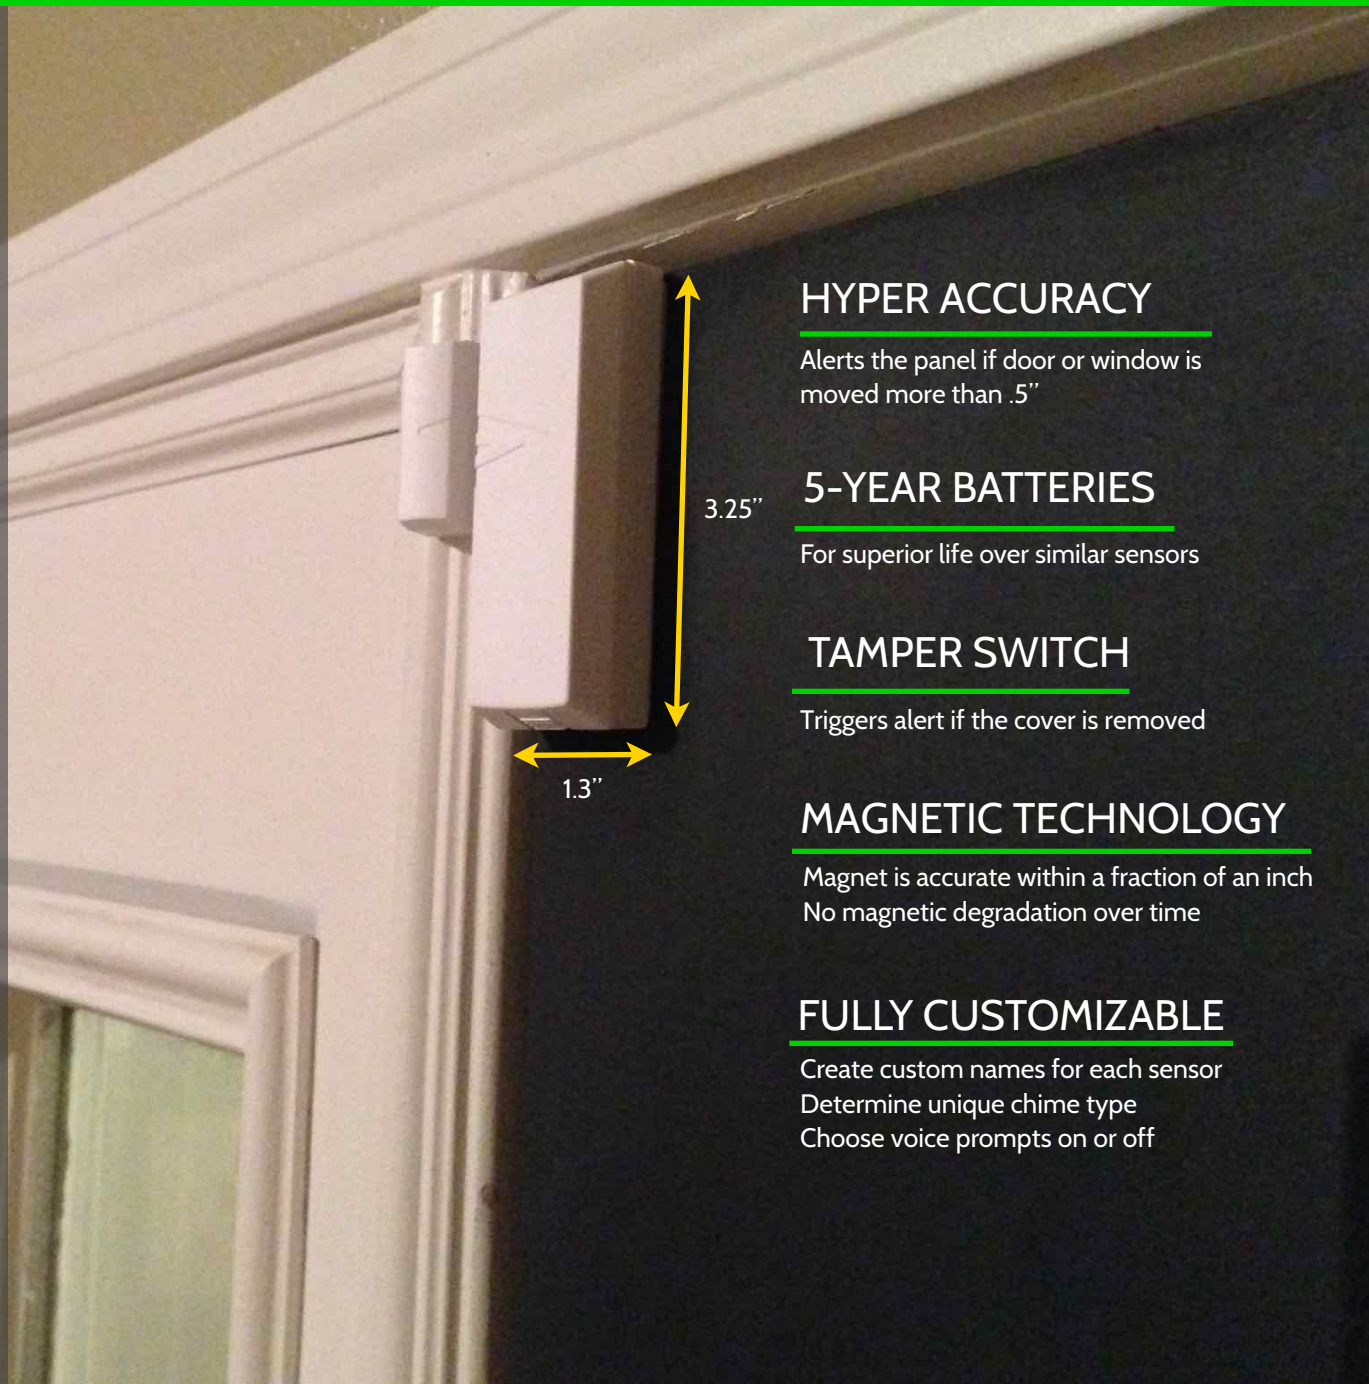

iPhone	Windows 7
Android	iPad
Blackberry	Kindle

With the IQ Door/Window you're always connected to your home. Place these sensors on each door and window in the home to create a protective perimeter around your home. Know when these doors and windows are opened with customizable chimes and create unique names for each entry and know when they have been opened and closed. With the interactive app you'll receive text messages when a door is left open

FEATURES

- Can be mounted on doors or windows
- Includes easy to apply adhesive
- Alerts IQ Panel if moved more than .5"
- Can be programmed as "Safety Sensor" for pool gates, medicine cabinets, gun safes, and liquor storage
- Using Alarm.com you can program alerts to your mobile devices informing if door or window is left open for a predetermined amount of time
- Requires two (2) 3V CR1203 Batteries

HYPER ACCURACY

Alerts the panel if door or window is moved more than .5"

5-YEAR BATTERIES

For superior life over similar sensors

TAMPER SWITCH

Triggers alert if the cover is removed

MAGNETIC TECHNOLOGY

Magnet is accurate within a fraction of an inch
No magnetic degradation over time

FULLY CUSTOMIZABLE

Create custom names for each sensor
Determine unique chime type
Choose voice prompts on or off

The IQ Mini DW disappears on any entryway. Less than 2" long and only a quarter of an inch thick it practically disappears.

With an innovative antenna design, the IQ Mini DW has superior range and keeps you connected to the IQ Panel better than ever before.

Can't see it? That's the point.

FEATURES

- Mount on doors or windows
- Can be screwed or glued in place
- Alerts IQ Panel if moved more than .5"
- Can be programmed as "Safety Sensor" for pool gates, medicine cabinets, gun safes, and liquor storage
- Using Alarm.com you can program alerts to your mobile devices informing if door or window is left open for a predetermined amount of time

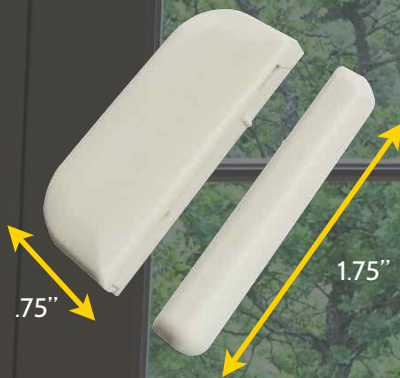

IMAGE SENSOR

No wires, battery powered

MOTION SENSOR

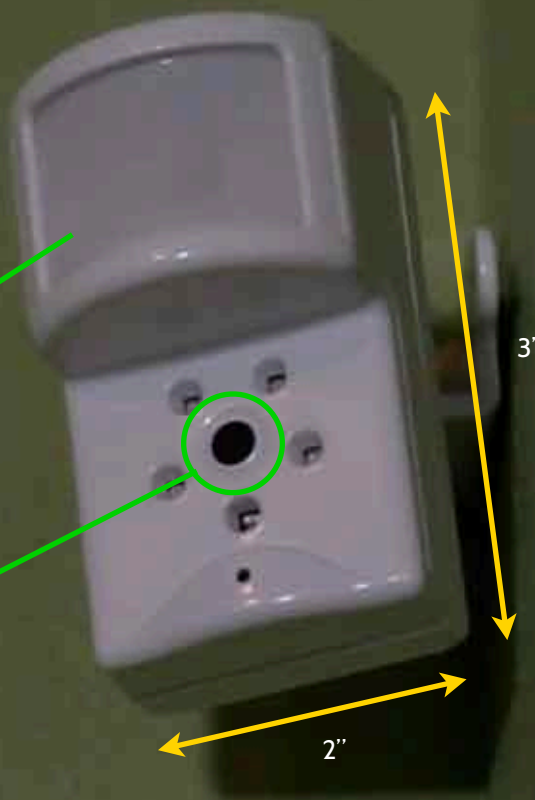

Infrared technology
Range up to 35'
Pet immune

STILL CAMERA

Takes 2 stills at a time
5 infrared LEDs for low light and dark conditions (like night vision)

VERSATILE MOUNT

Corner or wall mounted
Incrementally adjustable

The Image Sensor, powered by Alarm.com, is an innovative device that makes a consumer grade surveillance system an affordable reality.

With a still camera built into a motion sensor, the device combines two important features into a single device, making installation easy and maximizes affordability.

FEATURES

- Communicates directly with the Image Sensor radio built into the IQ Panel
- Takes pictures in both daylight and low light conditions
- Peek in right now, the next time the sensor detects motion, or when the alarm is triggered
- Images can be received via e-mail or text, or inside your Alarm.com mobile app

The IQ Motion is one of the most reliable ways to detect intruders. Often called your “last line of defense,” if someone manages to get past your sign, door sensors, and glass breaks, they will not defeat the motion sensor.

When installed properly, the device can also be “pet immune” preventing false alarms in homes with animals under 40 lbs.

A motion sensor is a vital part of every basic security system and is activated whenever you arm in “away” mode.

FEATURES

- Effective up to 35'
- Installed in corner facing AWAY from windows (to prevent false alarms from exterior motion)
- Cannot “see” through walls or curtains

The IQ Smoke is more than just a noisemaker. Its a way to detect the presence of multiple fire types, whether you are home or not.

FEATURES

- “Always on” technology ensures the sensor is monitored round the clock, whether your system is armed or not.
- Ultra sensitive smoke sensor prevents false alarms while constantly monitoring
- Heat sensor detects the rapid rise in heat that comes from a fire- even when there is no smoke (like an electrical fire)
- Wall or ceiling mounted
- 3-5 year battery life
- Requires 3-volt lithium batteries (x2)

Always connected, always on.

SMOKE SENSOR

Photoelectric sensor helps prevent false alarms by “seeing” smoke particles in the air

HEAT SENSOR

Detects a rapid rise in heat that typically indicates a fire, even without the presence of smoke

5"

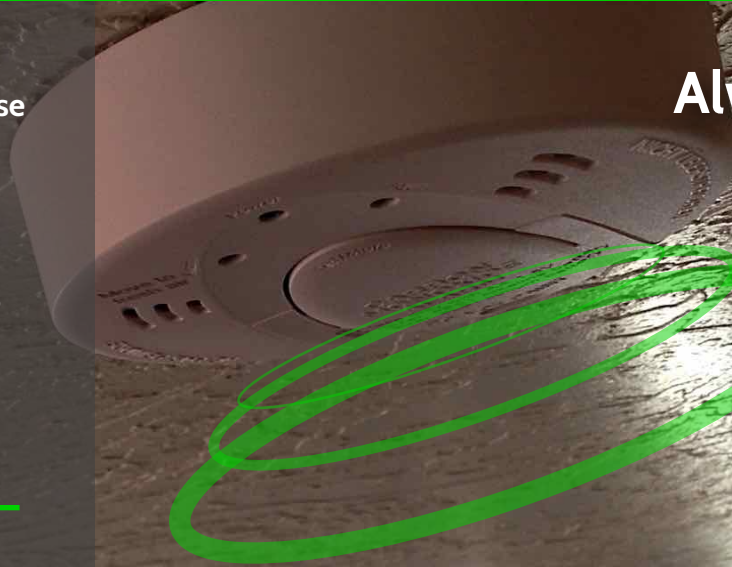

The IQ CO is a vital part of a home protection system, especially in those states that require detectors and in homes with gas stoves, furnaces, fireplaces and other appliances.

This sensor is monitored around the clock, even when the system is not armed.

FEATURES

- Always on, even when your system is disarmed.
- Especially useful in homes with danger of carbon monoxide leaks from appliances such as stoves, furnaces, fireplaces, and more.
- Test button to ensure device is operating correctly
- Built in siren in addition to panel siren
- Causes panel to emit "fire" tone and alerts monitoring station of carbon monoxide
- Should be installed low to the ground, where carbon monoxide would be located

Always connected, always on.

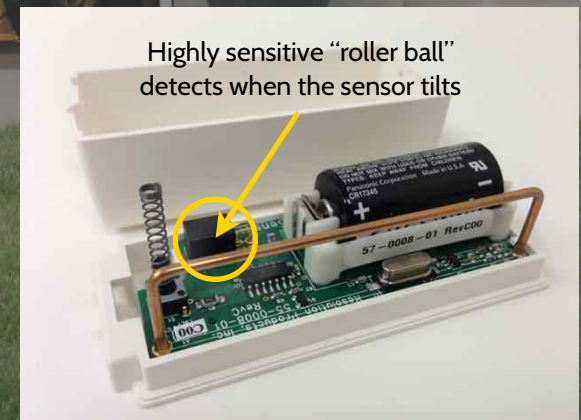

Know if it's left open

You know that sinking feeling when you return home and see your garage door open? An easy entrance into our home, we keep a lot of valuable things in our garage. From cars to tools, sports equipment to freezers full of food, there's often more valuable items in the garage than the rest of the house combined.

With the IQ Tilt, you'll know if the door is opened or closed, and can see that status on your IQ Panel or smartphone

FEATURES

- Detect current garage door "state"
- Create notifications to let you know if door is left open or when it closes.

The IQ Fob is one of the easiest ways to use your system. Most people find themselves remembering they haven't armed their system as they get into the car, or to busy carrying things to arm their system from the IQ Panel.

The IQ Fob allows you to activate your system within 100' of the IQ Panel, and has the hidden feature of being able to activate an intrusion or "police" panic by pressing "Lock" and "Unlock" together for 3 seconds.

FEATURES

- Lock button can arm in stay or away mode
- Unlock disarms system
- Up to 100' range
- Panic function

Convenience on a keychain

DISARM

Press once to disarm

ARM

Once to arm "Stay"
Twice to arm "Away"

The IQ Desk Fob is a great backup to arming and disarming your system, allowing users to activate their system from another room, like a bedroom or office.

Additionally you can activate a security or intrusion “panic” by pressing “Lock” and “Unlock” together for 3 sec, ensuring that if there is ever a problem, help will be there fast.

FEATURES

- Lock button can arm in stay or away mode
- Unlock disarms system
- Can be installed up to 100' from the panel
- Easy to install with adhesive that can be mounted to almost any surface
- Panic function

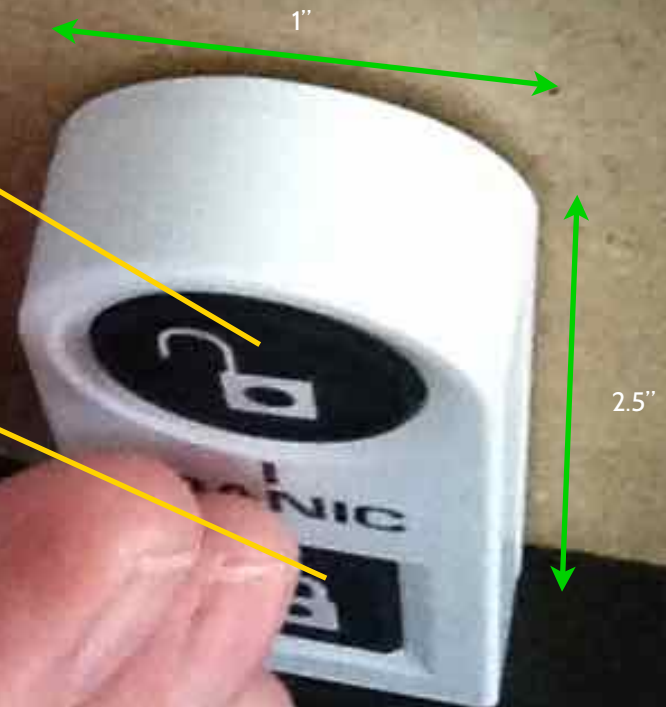

One touch arming hidden from sight

ARM

Press once to arm “Stay”
Press twice to arm “Away”

DISARM

Press once to disarm

Control and monitor energy usage

USAGE

Displayed in Watts or Kwh

DUAL OUTLETS

Control two outlets from your IQ panel or smartphone

The IQ Smart Socket is a revolutionary Z-Wave device that allows you to control two outlets from your panel or smartphone.

With a digital readout of real-time energy usage, the IQ Smart Socket will help you understand your energy consumption so you can make adjustments as desired.

FEATURES

- Control up to two outlets independently
- See real-time energy usage from the device or from your IQ Panel
- Get historical energy reports
- Assign custom names to your devices
- Create custom schedules to activate devices automatically

INDICATOR

Light indicates that power is being used

The IQ Panel easily pairs with the innovative Yale touchscreen door lock.

The IQ Panel supports a variety of Z-Wave door locks from multiple manufacturers.

Creating custom rules powered by Alarm.com you can arm your panel, deactivate your thermostat, and turn off your lights, all by locking your door.

FEATURES

- Program user codes from your IQ panel
- Grant access levels based on user type
- Assign custom names to your doors
- Create custom schedules to activate devices automatically

Touchscreen technology for your front door

The IQ Pendant is a one touch emergency alert device that can be worn around the neck, on the wrist, on a belt clip, or placed in a fixed location like a bedside table.

This button, when pressed, sends a signal to the IQ Panel that medical assistance is needed and works within 100' feet.

FEATURES

- One touch alert
- Great for elderly or those with medical conditions
- Works perfectly with Two-Way voice built into the panel, allows monitoring agent to talk to customer and relay important information to authorities en route
- Operates within 100 feet of the panel, even outside
- Fully sealed water resistant housing (not submersible, but tested to 1 meter depth)
- Can be worn as a lanyard or watch
- Triggers “medical alert” like the medical panic on the panel.
- Special “medical alert” tone emanates from panel

PUSH BUTTON

Press and hold for 3 seconds to send medical alert

Always connected, always within reach

The IQ TempH20 is three sensors combined into a single unit. With the flexibility to program it as a freeze sensor, flood sensor, and heat sensor, you'll know when there's a problem before it becomes a disaster.

FEATURES

- Titanium contacts
- Freeze detection alerts panel if temp drops below 45F
- Flood detection checks for presence of water every 5 seconds
- Heat sensor alerts panel if temperature exceeds 100F

Prevent disasters.

The Wireless Translator can interpret the signals sent by wireless devices using other frequencies, allowing you to pair keyfobs as well as door, window, and motion sensors already installed in the home with the IQ Panel.*

The Wireless Translator comes in two varieties:

Translator HT: Speaks “345 MHz”

Translator DS: Speaks “433 MHz”

FEATURES

- Translate multiple zones with a single device
- Significant cost savings over replacing every sensor
- Works within 100’ range of the IQ Panel
- 72 hour battery backup

**Will NOT operate wireless life safety devices such as smoke detectors or Carbon Monoxide*

The IQ Thermostat is an amazing device that perfectly compliments your home control system and could help reduce energy costs

FEATURES

- Easy install backplate and wiring for flexible mounting options
- Supports "Frequent Listening Routing Slaves" (FLIRS) when installed on 4 AA batteries for long battery life
- Supports "Always Listening" operation on 24vAC, acts as a repeater when installed with 24vAC
- "Normal" and "Simple" operation modes
- "Auto" feature enables automatic switching from heat to cool
- Standard (gas/electric) or heat pump compatible
- Multi-stage system compatible: (Standard HVAC systems: 2 stage heating, 1 stage cooling; Heat pump systems: 2 stage heating, 1 stage cooling)
- Selectable heat pump change over valve
- Built-in flash memory stores heat and cool program settings
- Temperature display in F or C
- Adjustable temperature control swing/differential.
- 12/24 hour clock
- Programmable filter counter
- Low battery indicator
- Speaks Z-Wave

The IQ Glass adds an extra level of perimeter defense to your door and window sensors.

Featuring pattern-recognition technology for superior detection and false alarm immunity, protects all glass types up to 1/4"

Easily mounted to walls and operates when system is placed in "Stay" or "Away" mode.

FEATURES

- Active when you arm in "stay" or "away" modes.
- Typically installed on the wall opposite the windows needing protection, or on the ceiling in a room with windows on multiple sides.
- Up to 20' range
- LED light activates when device detects sound

RECEIVER

Detects the pitch and frequency of breaking glass

LED LIGHT

Turns on when the device detects sound
